PROFILE

I am a beginner front-end developer who wants professional advancement. Once I saw a front-end development and what it consists of, I realized that this is for me and I want to do it. I like the combination of working on the visual part and working with the code using JavaScript. I am counting on the possibility of stable development in the company, cooperating on a long-term basis. I want to learn new technologies and improve in practice, bring benefits and make the world better.
